Seedling 3R13. Parentage: Open pollinated seedling of 'Allegro'. First bloomed 2012. First propagated 2016. SINGLE with 2 rows of petals. One flower per stem, 20 cm (8") in size. Large soft pink petals, nicely cupped, 8 cm (3") in width. Black flares extend 30% of petal's length, with bleeding edges. Carpels white, moderately hairy, 5 in number. Stigmas white, normal anatomy. Pollen-bearing stamens, filaments pink at base, white at the tips. Sheath red, complete. Fragrance. Blooms early/mid-season. Typical Gansu Mudan foliage of good substance. Spreading upright growth habit to 100 cm (40"). Vigorous and healthy plant. To be propagated and distributed by W. Giessler, Gross-Rosenburg, Germany.
